# Welcome

*“Minimal is more: Shaping the Future of Breast Surgery”*

Dear Colleagues and Partners,

It is with great pleasure that we invite you to participate in a groundbreaking event in Reconstructive and Aesthetic breast surgery: The Minimally Invasive Breast Surgery Meeting, (MIB), is to be held in Paris on June 6th and 7th, 2025.

MIB will present concepts shaping the future, highlighting the latest advancements and cutting-edge techniques in minimally invasive procedures applied to oncologic, reconstructive, and aesthetic breast surgeries. Our topics will range from robotic-assisted surgery and tissue preservation concepts to how to provide a safer and faster patient recovery with the least possible medication.

We truly believe MIB differentiates itself from other conventional scientific events, by addressing a pivotal and dogmatic shift towards a more standardized, precise, and less invasive breast practice that will enable you to prioritize your patient's well-being even further.

## Why attend?

- Innovation and the future: This congress offers a unique opportunity to discover the technological and methodological innovations that will shape the future of breast surgery.
- Live surgeries: Experience live surgical demonstrations performed by international experts, offering a real-time look at the most advanced techniques.
- Exclusive masterclasses: Participate in hands-on masterclasses led by world-renowned specialists, deepening your knowledge and refining your skills.
- Plenary sessions with international top experts: Engage with leading figures in the field as they share their experiences and insights on the evolving practices of breast surgery.
- This is a Non-profit meeting: All the overhead will be earmarked for research, scholars, and fellowships. These will be granted to the participants of the meeting, best papers, and true applications to the MIB association. This is our gratitude and our legacy to all the masters who shared their knowledge with us.

Set in the heart of Paris, the congress will be held in a warm and welcoming atmosphere. It will combine a high level of scientific excellence with an unparalleled opportunity for collaboration and exchange.

This congress is a rare opportunity to be at the forefront of medical innovation, to meet pioneers in breast surgery, and to enrich your practice with the tools and knowledge that will transform traditional approaches to oncologic, reconstructive, and Aesthetic surgery.

Looking forward to seeing you in Paris,

Congress Chairmen
